ACHIEVEMENTS 2025

INVITATION FROM NHS ENGLAND - LEEDS

Our PCN was recently invited by NHS England to take part in a national panel discussion in Leeds, giving our experience as one of the largest and most successful mass vaccination providers in the country. Nick Duggan and Ryan Smith attended on behalf of the PCN, after being approached by NHS England's Digital Vaccination Services team. The event brought together around 100–150 national colleagues to explore frontline experiences of running vaccination programmes and the role of digital tools such as RAVS and the national booking service. Our PCN contributed to the panel alongside representatives from hospitals, pharmacies and school vaccinators, sharing insight into how large-scale vaccination delivery works in practice and helping shape future improvements to national digital services.

We have been supporting Myton Hospice in advertising and piloting the Compassionate Neighbours project in the Kenilworth and Warwick area. Myton Hospice even needed to pause recruitment due to the high level of interest. Referrals are now live and can be accessed here - Myton Compassionate Neighbours - Referral

Compassionate Neighbours -
"The Compassionate Neighbours Programme is a community-based initiative that offers social and emotional support to people (Community member) who are living with or caring for someone with a life-limiting illness, those who are recently bereaved, and are feeling lonely or isolated."

KENILWORTH AND WARWICK INT LAUNCH

We officially launched our Integrated Neighbourhood Team back in July, 2025 where we had a F2F meeting with various stakeholders in attendance. We had colleagues from primary and secondary care, Warwickshire County Council, social care, ICB, patients and more. We met to discuss the current challenges we face and how we can collaborate to work more closely at supporting the needs of our community.

The successful, inspiring meeting led to building relationships and creating opportunities for us to support each other and the community.

It was the first step at building our future, together.
